- Gel Version, Stands on Vertical Surfaces
- Interior and Exterior

No -Rinse Biodegradable Paint Stripper -Gel Version

- Does Not Alter Surfaces
- Non-Corrosive
- Odourless & Non-Flammable
- Methylene Chloride -Free

SPECIFICATION TEXT

Guard Remover[®] Eco VG Painted Surfaces is a powerful new-generation stripper designed for stripping paints, varnishes and organic coatings.

Guard Remover[®] Eco VG Painted Surfaces has been designed to meet the varying requirements of applicators in terms of safety during application, effectiveness, impact on the environment and respect for the surfaces treated.

Guard Remover[®] Eco VG Painted Surfaces contains no chlorinated solvents, no paraffin, non-harmful product. It does not have the drawbacks of traditional strippers (flammability, hazardous to the user and to the environment...).

In the form of a viscous liquid, Guard Remover[®] Eco VG Painted Surfaces can be applied with a brush. Once applied, it can stand several hours on vertical surfaces without problem (e.g for night work). The fact there is no paraffin, substrates can be cleaned easily without rinsing and then be covered with a new coat of paint or coating.

APPLICATION

Use neat: do not dilute.

- Always test on a small hidden portion of the substrate before applying.
- Shake the product well before use.
- Apply the product liberally to the surface to be treated.
- Allow it to act from one up to several hours in order for the coating to fully soften.
- The product can stay all night and be removed the following morning.
- Remove all the material with a knife or spatula.
- Only scrape, no rinsing required.
- Brush to eliminate the residues with a hard bristle brush (such as scrubbing brush). Do not use a metallic brush.
- Cleaned surfaces can be covered with a new paint or coating after 24h drying.
